

**METHOD AND APPARATUS FOR PRINTING ON FLAT AND NON-FLAT
OBJECTS**

ABSTRACT OF THE DISCLOSURE

A method and system for printing graphics, text, logos, or other photographic or digital images (collectively, a “picture”) on a flat or non-flat surface. The surface may be spherical, oblate, cylindrical, flat, or a combination of different curves or shapes. Similarly, the photographic or digital image may be of a variety of computer-readable file formats. The embodiment may employ ultraviolet inks to print the picture on the surface. A variety of pictures and surfaces may be combined to create nearly unlimited products.
